- TABLE 4D: Import and Export of Fibre By All N.B. Mills During 2008 39

Introduction

The purpose of the Timber Utilization Report (TUR) is to provide the most reliable information on industrial fibre consumption as a basis for forest resource management planning and government decision making. It also provides information on individual mill consumption, fibre imports and exports, and sawmill residue production and consumption.

The data presented in the report summarizes information collected by the Department of Natural Resources (DNR) for the fiscal year April 1, 2008 to March 31, 2009. All pulp and paper mills, fibreboard, panel mills, and stand-alone wood pellet mills were sampled. Only those mills consuming more than 500 m^3 of roundwood were included in the survey. As a result, total roundwood consumption may be slightly higher than the survey indicates. For the purpose of this report fibreboard, panel mills, and pellet mills will be included under the sawmill headings.

The TUR is divided into four parts as follows:

Part 1 summarizes the industrial roundwood consumption from various sources by industry type.

NOTE: Table 1D: Own Freehold, Industrial Freehold, & Federal Lands Roundwood Consumed (m^3) in N.B. will no longer be included in the TUR. Volumes sourced from "Own Freehold Lands" are now included in the "Industrial Freehold" volume in Table 1A. Volumes sourced from "Own Freehold Lands" by individual mills are indicated under the "Industrial Freehold" heading as "OFH" in Table 2 of this report.

Part 2 lists individual mill consumption by source and species.

Part 3 lists those pulp and paper mills consuming chips and other residue, as well as, individual sawmills producing chips and residue.

Part 4 lists all mills importing and exporting roundwood, chips and other residue by industry type.

All values presented in the following tables are in cubic metres except for biomass, which is reported in metric tonnes.

Executive Summary

The number of mills represented in the TUR has decreased from 64 mills in 2007, to 52 mills in 2008. Table A (right) shows the representation of pulp & paper mills, sawmills, fibreboard mills, panel mills, and stand-alone pellet mills from 2005 to 2008. Based on the information received from these mills, overall roundwood consumption decreased in 2008 by 586,901 m^3, approximately 6.9% from the previous year. New Brunswick sawmills reduced consumption of roundwood by 479,646 cubic metres or 8.4% as a result of permanent mill closures, temporary downtime, and reduced shifts.

Table A. Mill Representation by Type

		Mill Type				
Year	Total	Pulp & Paper	Sawmills	Fibreboard	Panel	Wood Pellet
2005	76	9	64	1	2	0
2006	69	8	58	1	2	0
2007	64	8	54	1	1	0
2008	52	6	44	1	0	1

Figure 1. Total Mill Roundwood Consumption in New Brunswick from 1999 to 2008

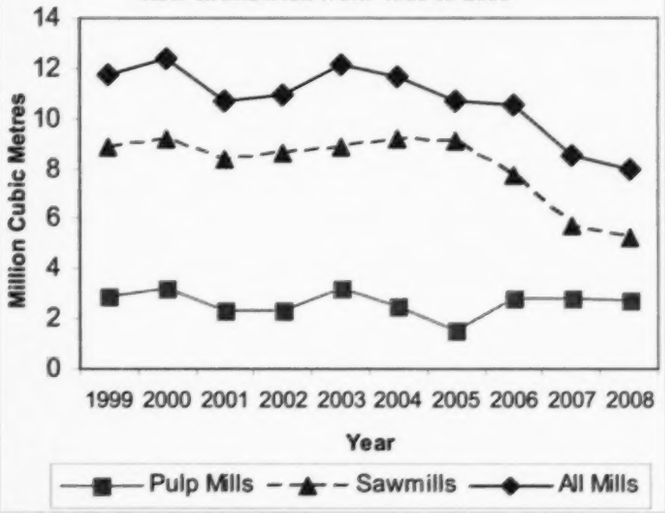

Figure 1 (left) shows the steady decline in roundwood consumption by sawmills since 2003.

Table B (right) shows how each land base is being impacted in terms of roundwood production compared to the previous year.

Table B. Effects of Overall Reduction in Roundwood Consumption on Individual Land Ownerships from the Previous Year (2007).

Ownership	%	m^3
Crown	+5.8	+ 244,022
Industrial Freehold	-10.0	- 232,407
Marketing Boards	-30.7	- 264,017
Imports	-29.1	- 336,724

Overall chip consumption by pulp mills decreased by 638,247 m^3 or 20.5% from 2007. This reduction can be attributed to the closure of 2 pulp mills during the 2007 fiscal year, the downtime associated with the conversion of the AV Nackawic mill, and the utilization of more pulp wood in order to offset the reduced sawmill chip supply that has declined by 301,992 m^3 or 10.8% since 2007.

During 2008, the housing crisis in the United States significantly impacted nearly all of the mills in New Brunswick. This created an erosion in demand and pricing for softwood and hardwood lumber, OSB, plywood, and shingles. Consumption of other goods in the United States fell resulting in negative effects on the paper, packaging, and pallet industry in New Brunswick.

Abbreviations, Acronyms & Descriptions of Fibre Sources

Marketing Boards	
CVC	Carleton-Victoria
MAD	Madawaska
NSH	NorthShore
NTH	Northumberland
SENB	SouthEastern New Brunswick
SNB	Southern New Brunswick
YSC	York-Sunbury-Charlotte
Federal Lands	
Acadia	Acadia Research Forest
BGT	Base Gagetown
RES	First Nation Reserves

Province/State	
ME	Maine
NB	New Brunswick
NH	New Hampshire
NS	Nova Scotia
PEI	Prince Edward Island
QC	Quebec
ON	Ontario

7	Queens-Charlotte-Fundy
8	York
9	Carleton-Restigouche-Tobique

Description of Roundwood and Fibre Sources

Marketing Board Lands – Roundwood volumes harvested and consumed that originated from private land in New Brunswick is reported under the appropriate board.

Federal Lands – Roundwood volumes harvested and consumed that originated from lands owned by the federal government of Canada.

Industrial Freehold Lands – Roundwood volumes harvested and consumed that originated from lands owned by companies that operate a processing facility in New Brunswick.

Crown Licenses – Roundwood volumes harvested and consumed that originated from Crown land in New Brunswick is reported under the appropriate Crown license.

Import Sources – Roundwood harvested outside the province and consumed by facilities in New Brunswick.

Residue Volumes – Fibre that is produced by another facility in the process of consuming roundwood. Only fibre that is used in the production of an end product is included in this column. Residue volume can include chips, sawdust, trim ends and/or shavings. Fibre that is used as biomass or hog fuel is not included.

PRODUCT LIST

April 01, 2008 to March 31, 2009

Roundwood	Roundwood	Mill Residue, Chips and Other
SOFTWOOD	**HARDWOOD**	Softwood Chips (SWC)
Spruce, Fir, Jack Pine Veneer (SPFV)	Hardwood Veneer (HWV)	Hardwood Chips (HWC)
Spruce, Fir, Jack Pine Sawlog (SPFL)	Poplar Veneer (PV)	Planer Shavings (Shav.)
Spruce, Fir, Jack Pine Studwood (SPFS)	Hardwood Sawlogs (HWL)	Softwood Sawdust (SWSD)
Spruce, Fir, Jack Pine Lathwood (LATH)	Hardwood Pallet (HWPL)	Hardwood Sawdust (HWSD)
Spruce, Fir, Jack Pine Pulpwood (SPFP)	Poplar Sawlogs (PL)	Biomass/Hog Fuel (HWGF)
Spruce, Fir, Jack Pine Treelength (SPFTL)	Hardwood Pulpwood (HWP)	Sawdust, Shavings, etc. (Other)
White Pine Veneer (WPV)	Poplar Pulpwood (PP)	
White Pine Logs (WPL)	Hardwood Spoolwood (SPOOL)	
White Pine Pulp (WPP)	Hardwood Fuelwood (HWF)	
White & Red Pine Sawlogs (WRPL)	Hardwood Ties (HWTi)	
White & Red Pine Pulpwood (WRPP)	Poplar Ties (PopT)	
White Pine Stud (WPS)	Hardwood Full Tree Chips (HWFC)	
Red Pine Pulpwood (RPP)		
Red Pine Poles (RPPO)		
Red Pine Stud (RPS)		
Red Pine Treelength (RPTL)		
Jack Pine Poles (JPPO)		
Cedar Poles (CEPO)		
Cedar Sawlogs (CEL)		
Cedar Studwood (CES)		
Cedar Treelength (CEDTL)		
Cedar Pulpwood (CEP)		
Cedar Fencing (CEF)		
Cedar Shingles (CESH)		
Hemlock Sawlog (HEML)		
Hemlock Pulpwood (HEMP)		
Larch Sawlogs (LL)		
Larch Pulpwood (LP)		
Larch Veneer (LV)		
Softwood Full Tree Chips (SWFC)
